

APPRENTI[™]

**Access to Diverse
Tech Talent**

Benefits & Requirements

Apprenti streamlines the screening process for hiring the diverse tech talent your company needs.

- > **Diversity:** Apprenti is focusing on increasing diversity. About 50% of current apprentices are women, 54% are minorities, and 20% are veterans. With an average age of 30, they bring a wide range of backgrounds and experiences to help them make the leap to tech careers.
- > **Pre-Screened Talent:** Apprenti recruits candidates who demonstrate aptitude for tech occupations. Apprenti staff pre-screen highly ranked candidates via phone and in-person before bringing the best to your company for interview. Companies choose their apprentices based on aptitude and cultural fit.
- > **Trained & Tested Professionals:** Apprentices receive two to five months of accelerated occupational training prior to beginning on-the-job training. Companies train apprentices on the specific skills they need to drive results for your organization.
- > **Compliance:** Apprenti handles all state and federal registration and reporting so you don't have to. You simply assign someone to supervise the apprentice who has been in a similar job for at least two years. Apprenti will gather periodic feedback from the company and manager to monitor progress and satisfaction.
- > **Retention:** Your company can extend full-time offers to the fully trained apprentices once their apprenticeship is complete or as early as six months; however, retention is not required.
- > **Cost Savings:** Registered apprentice salaries are 60% of market rate, offsetting your investment in on-the-job training. A one-time increase to 70% of market rate is provided at 6 months based on improved proficiency. Save on recruitment costs! Your company pays a one-time placement fee of \$2,500 per apprentice.

Apprenticeship

To address our tech workforce challenge, the WTIA Workforce Institute works with companies to identify jobs that can be filled by highly competent people, regardless of education background. Apprenticeship is an established practice in other industries for developing talent, combining classroom instruction and on-the-job training under the supervision of an industry professional. Apprenti is the registered technology apprenticeship program that provides you diverse tech talent. Apprenti works with industry to create standard job taxonomies for apprenticeable technical jobs that lead to a career in the industry. Our program offers benefits to companies of all sizes.

“Our partnership with Apprenti enables us to influence the curriculum and training provided to apprentices and lets us do the on-the-job training.”

— *Chuck Edward, Head of Global Talent Acquisition at Microsoft*

Apprenti Profiles

“Apprenti offers an innovative approach to an issue of increasing urgency for employers: a skilled workforce that reflects the diversity of its partners, customers and communities. It is essential to our company's and the technology industry's long-term, competitive growth that we recruit and retain talent from a more diverse population.”

— *Julian Eames, Executive Vice President and Chief Operations Officer at F5 Networks*

I'm Aeone, and I have an associates degree in computer science. Previously I worked in customer service and the insurance industry. Now I'm in training to become a software developer at Microsoft. Through Apprenti I am able to advance my career and build on my degree.

I'm Jared, a former Air Force pilot. I wanted to start a new career that kept me closer to my family. I had dabbled in tech before joining the Air Force and am accustomed to working in high-pressure environments. Thinking apprenticeship is a good way to learn a new career, I applied to Apprenti and am now apprenticing as a Network Security Administrator at F5.

I'm Rami, an immigrant with an ICT degree from Tunisia. I took web development courses in U.S. to move into a tech career here and am now in training to become a software developer at Microsoft. Apprenti gave me the pathway into my career and apprenticeship will ensure I have the skills I need to succeed long-term.

Hi, I'm Darcy! I graduated with a fine art degree and am fluent in Mandarin after working in China. When I returned to the U.S. I ended up in a customer service environment, but knew I was destined for a greater intellectual challenge. After completing my training through Apprenti, I'm now a Web Developer at F5!

Select Hiring Partners

Current Occupations & Certifications

Additional occupations are under development. If there are other jobs your company would like to fill, contact Apprenti staff; we can file occupations or build a specialized program.

For detailed information about training and providers, visit <http://apprenticareers.org/apply/#training>.

Screening & Hiring Process

Apprenticeship candidates take an online assessment that assesses their math, logic and critical thinking, and soft skills.

Apprenti staff pre-screen and interview candidates to match the jobs you want to fill.

Your company interviews candidates and selects apprentices based on attitude, aptitude, and cultural fit.

Apprentices complete two to five months of technical training before they begin one year of on-the-job training at your company.

Contact Jennifer Carlson at jcarlson@washingtontechnology.org to learn more about how apprenticeship can help you meet your workforce needs:

- > Send us information about the jobs you want to fill and desired fill dates
- > Identify executive sponsor and key contacts
- > Sign contract
- > Begin interviewing candidates
