

Paving the path for talent in tech.

## Build Talent in Aerospace & Aviation through Registered Apprenticeship

At Apprenti, we create alternative pathways to access diverse tech talent and help organizations address digital skills shortages **through the pathway of registered apprenticeship**. With over 264,500\* new tech roles created last year, and only 75,000 college graduates, 375,000+\*\* tech positions go unfilled. The gap grows exponentially year over year and the need for employers to quickly invest in tech talent is clear.

### Good Jobs Challenge Grant

As the national leader in registered tech apprenticeships, Apprenti was awarded the Department of Commerce **Good Jobs Challenge (GJC) grant**. Over the three-year grant term, Apprenti will address the talent shortage throughout the Aerospace & Aviation sector by placing 1,000 apprentices in high-demand roles across the nation.

## Benefits and Cost Savings

Apprenti can source apprentices and offset training costs.

The sourcing alone yields a 30% cost savings at minimum over traditionally sourced talent.

91% of Apprenti placements come from underrepresented groups.

By offsetting training costs, Apprenti helps organizations build talent pools that will extend beyond the life of the grant.

Aerospace & Aviation roles currently available through Apprenti:

# Cybersecurity Analyst

# Software Development

### Gain Access to Tech Talent

For more information on developing your own pipeline of Aerospace & Aviation roles, please contact **Becky Baumann, Commerce Grant Project Manager**, at [goodjobschallenge@apprenticareers.org](mailto:goodjobschallenge@apprenticareers.org).
